To:

ENG. PHILIP P. CARPINA
School Principal
Bacolod Tay Tung High School, Inc.

Dear Engineer Carpina,

Good day!

I am Erfel Suriaga, an explorative teacher in mathematics and science. I write this letter to humbly inquire about your amazing school, Bacolod Tay Tung High School, regarding the vacant teaching positions for the incoming School Year (S.Y.) 2026-2027. I am interested in applying in case you look for an elementary teacher in either subject.

As a teacher in elementary, I have specializations in Mathematics and Science and I continue studying the advanced parts of the subjects (especially their applications) up to this day. Aside from this, I have a huge idea how to actually teach those subjects to learners at the said level, for I had actual teaching experience for two school years in a private school, and three months in a public school as substitute teacher. Prior to these, I was a tutor for almost two years in a tutorial center in Cadiz City where most of the tutees were from kindergarten to sixth grade. I also had training on improving the classroom experience.Among them was the Language Strategies in Teaching Mathematics and Science conducted by the Philippine Science Institute in December 2022. I also have other skills- specifically in computer tasks and research, that I think will be indirectly helpful to any of my intended roles.

Along with this letter are my curriculum vitae and university transcript which you can use to further see my qualifications if you indeed look for a teacher in either subject. I am really willing to contribute to the continuing success of your school and I will look forward to hearing back from you soon.

Thank you very much and God bless.

Sincerely,

ERFEL SURIAGA
Teacher Applicant
